

Bosch Rexroth 'EcoSafe' Guarding System

The Versatility of EcoSafe™

Bosch Rexroth offers the versatility of EcoSafe™, a wide range of machine and perimeter guarding options for creating physical enclosures, guards, and barriers to protect workers. EcoSafe™ panels assemble and install easily from standard components. Partitions can be constructed of wire mesh screens, protective panes or panels, and then mounted directly into T-slot profiles that have already been integrated into a system.

Easy and Inexpensive

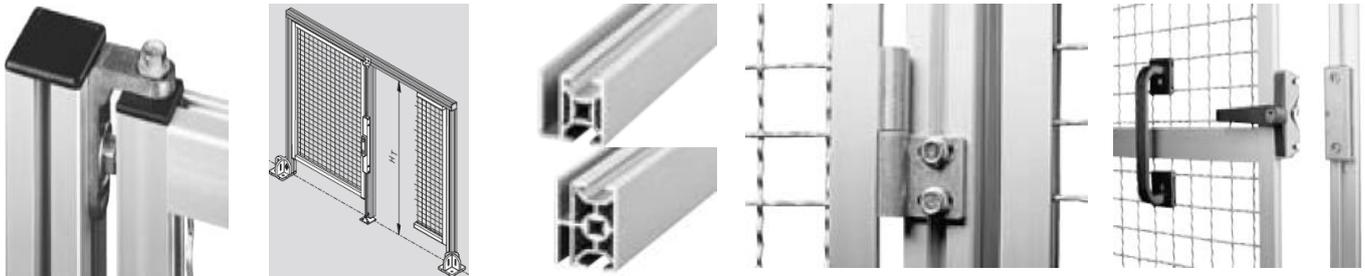

The EcoSafe™ Guarding System gives you more flexibility and versatility than any other perimeter guarding/enclosure system available. With pre-assembled, ready-to-use components, EcoSafe™ is easy to plan, quick to install and integrates easily with other structures made from aluminum framing, such as conveyors, ergonomic workstations and custom machinery.

Safe and Attractive

EcoSafe™ can be installed to meet even the most stringent safety standards and is ideal for perimeter guarding, machine enclosures, and factory fencing. The clean lines and anodized aluminum surface provide an attractive, modern appearance, while at the same time keeping your plant safe and secure.

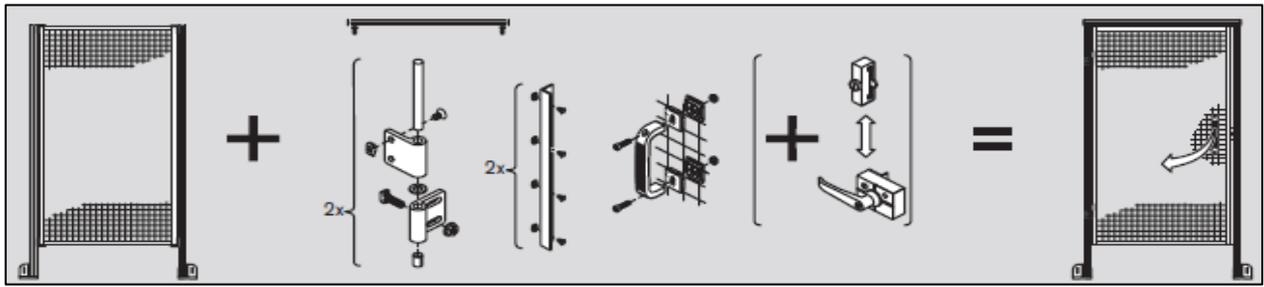

Fast and Efficient

Installing EcoSafe™ is a snap. Mark the desired perimeter with a simple chalk line, anchor the support posts to the floor and install the convenient "hook and hang" brackets; now you're ready to hang the panels. Two screws each and you're done! The same easy-to-use design makes it easy to relocate, expand or change your guarding too--with minimal time and labour.

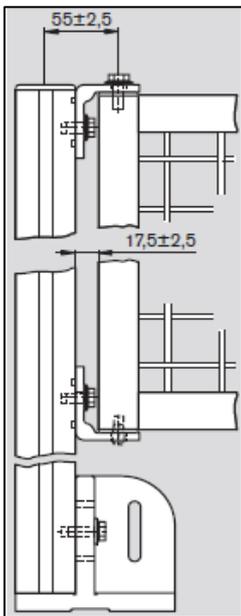

When correctly installed EcoSafe fulfils the stringent safety requirements of the European standards BS EN292, BS EN294 and BS EN811. This guarding is also Machinery Directive compliant 2006/42/EC

Economical Protective Barrier systems that is completely versatile!

- Comes in standard size, 0.5m, 0.75m, 1m, 1.5m & 2m widths
- Available with different post sizes of 45x45, 45x90 or 90x90
- Pre-constructed assemblies
- Quick and simple assembly
- Universal fastening groove
- Attractive design
- Easy for retrofits and upgrades
- Options for 0.75m and 1m wide doors or sliding doors
